Reservation
Request fulfilment

Transactional Status

UI diagrams:

Server errors:

- 500 Internal Server Error: The server encountered an unexpected condition that prevented it from fulfilling the request.
- 501 Not Implemented: The server does not recognize the request method or it can't fulfil the request.
- 502 Bad Gateway: while the server acting as a gateway or proxy, received an invalid response from the upstream server.
- 503 Unavailable: Server is overwhelmed with requests or down for maintenance.
- 504 Gateway Timeout: The server was acting as a gateway or proxy and did not receive a timely response from the upstream server.
- 505 HTTP Version Not Supported: The server does not support the HTTP protocol version used in the request.

Client errors:

- 400 Bad request: when a request sent to the website server is incorrect or corrupt, and the server receiving the request can't understand it.
- 401 Access denied: the credentials you entered were invalid
- 403 Forbidden: Sever understands the request but will not fulfil it.
- 404 Not found: the server can't find the requested resource
- 408 Request time-out: server does not receive the full request from the user within the set timeframe it has allocated to wait
- 410 Gone The requested resource is no longer available at the server.
